

SUCCESS STORY ABEL ALARM

Industry: Professional services

About Abel Alarm

Abel Alarm are recognised nationally as being a leading installer of commercial and home security systems including smoke, fire and intruder alarms.

Abel Alarm is certificated and accredited by the leading major industry bodies for providing the highest standard of quality and services.

Challenges

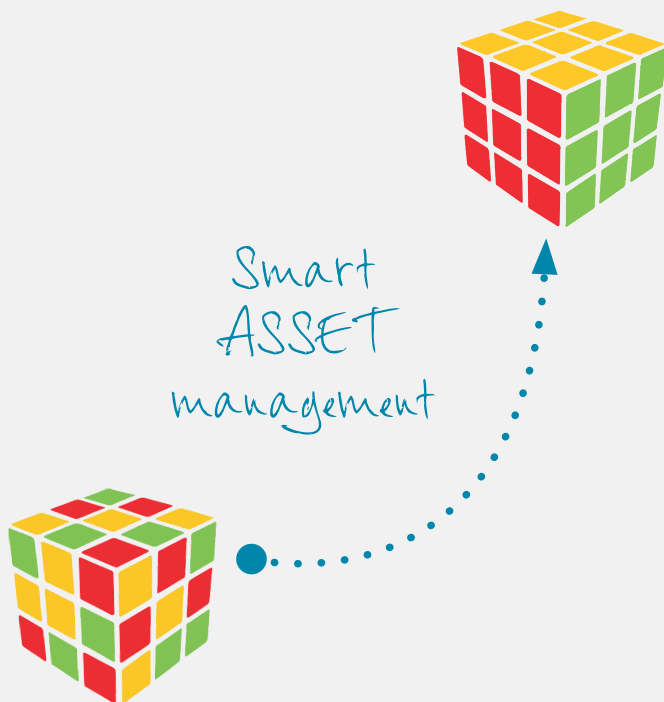

- Multiple site management - tedious and time consuming
- Numerous accounts with different suppliers made monitoring and managing energy consumption and costs almost impossible and inefficient
- Various admin issues due to new sites added to their asset portfolio and sites sold / removed from their portfolio

Solution

- We made all sites under co terminus end dates
- Thorough bill validation for invoice accuracy
- Historical refund analysis and revenue recovery
- Intelligent procurement for the Best Value

Results

- In 2013-2015 we achieved savings in total of **£10,330** on electricity and gas
- Carried out billing and energy supplier consolidation successfully
- Abel gained a truly efficient management of energy consumption and costs
- Advice and support for new sites additions with Change of Tenancy and backdated/final billing on sold sites

We have been with Monarch for three years now and have been impressed with the savings made year on year. The initial transfer of our numerous accounts was painless. Since day one, Monarch have provided an excellent level of customer support. We can honestly and happily recommend them.
