

Ogier Electronics

Vehicle CCTV Solutions

Benefits

Ogier Electronics are delighted to offer a complete mobile unit equipment installation service for rapid response CCTV vehicles, from single operator control to multiple screen capture and record. All Ogier equipped vehicles benefit from COFDM video transmission technology to deliver broadcast quality video to incident rooms and Command and Control Centres from the front line.

Options

- In addition to in-vehicle recording each vehicle provides a variety of transmission techniques ranging from full non line of sight DVB-T broadcast quality real time video to cellular networks.
- The vehicle can provide a local Wi-Fi hotspot for access to the Internet.
- With a range of remote viewing options including web browsers and Apps for iPhone and iPad you can be sure that robust transmission is at the heart of every mobile system.

Features

Whilst every vehicle is provided to match the customer final specification, the typical range of options may include, number and different type of cameras, number of workstations, choice of wireless transmission techniques and, of course vehicle type for either overt or covert surveillance duties. A list of typical features is provided overleaf.

Ogier will provide all the technical advice, support and training for vehicles supplied, plus comprehensive operator documentation. All equipment supplied is guaranteed for 12 months from delivery however the vehicle guarantee is as covered by the original vehicle manufacturer and starts from the date the vehicle is delivered to Ogier for fit out.

The finish inside each vehicle is to Ogier's demanding specification and each vehicle is provided with safety equipment including fire extinguishers and first aid equipment.

Ensuring that the vehicle is not only safe but can operate for long periods without the need for external power is a vital factor for surveillance vehicles. Ogier ensure that the vehicles have sufficient back up battery power and charging capability to stay on duty for up to 24 hours without the need for external power supplies and, with engine recharging the capacity for duration is only limited by the fuel tank.

Basic Specification

COFDM LOS up to 30Km
NLOS up to 3Km
DVR H264 Compression
CIF Resolution
