## Empowering Security Officers to Do More

A desktop application to improve officer productivity & accountability.

### Get The Most Out of Your Officers

Equip your officers with easy-to-use technology to stay on top of security tasks ensuring that people and assets are protected at all times. Trackforce ensures officer accountability, improves operational efficiency and enables better communication between officers, operations and management.

#### Improve Efficiency & Accountability

From post orders, incident & activity report templates to attendance tracking, officers are guided step-by-step through their assigned tasks and are enabled to complete their shifts efficiently.

#### Increase Productivity

Trackforce increases security officer productivity by over 30% giving you the opportunity to grow your business, not your headcount.

#### Optimize Security in Real Time

Validate KPIs and get real-time visibility into the security situation to be able to reallocate resources where they are needed the most.

Incident & Activity Reports

Time & Attendance Tracking

Visitor Management

Post Order Management

Geolocation & Officer Dispatch

GSOC (Global Security Operations Center)

Training & Certification Alerts

# Powerful, Essential Tools

Post comes fully functional right out of the box empowering security officers to stay on top of their duties.

## INCIDENT & ACTIVITY REPORTS

**Customizable incident and activity reports streamline communications and ensure consistency.**

- Configure templates per site, incidents & include multimedia
- Alert stakeholders when reports are created, modified or completed
- Improve report quality & standardize processes

## GIVE ORDERS, MAKE CHANGES ON-THE-FLY

**Post order management allows operations managers to distribute workforce instructions or make changes in real time.**

- Ensure that correct procedures are always followed
- Increase accountability with officer document acknowledgement
- Add multimedia to your orders to clarify instructions

## AUTOMATIC TIME & ATTENDANCE TRACKING

**Get rid of traditional time clocks or paper timesheets and easily capture everything online.**

- Get insights into workforce productivity
- Stay compliant with labor laws & simplify payroll processing
- Real-time alerts enable immediate response for coverage issues

## TRAINING & CERTIFICATION ALERTS

**Keep security officers up to date with training and other regulatory requirements.**

- Alert stakeholders when certifications are expiring
- Collect, retain & organize training records online
- Maintain online documentation of credentials reducing legal risks

## IMPROVED VISITOR MANAGEMENT

**Streamline visitor check in & check out. Customize visitor profiles & get real-time access to visitor lists.**

- Eliminate the paper logbook & capture data online
- Real-time access to current visitor lists
- Reduce threats and screen against unwanted visitors

## GEOLOCATION & OFFICER DISPATCH

**Track & locate officers at any time & dispatch based on proximity & availability for an alarm response or emergency.**

- Get an aerial view of your entire security officer operation
- View status, proximity and estimated drive times to incidents

## GSOC (GLOBAL SECURITY OPERATIONS CENTER)

**Be constantly aware of your security situation & unify threat analysis across multiple sites with a GSOC.**

- Monitor & control all sites from a command center
- Centralize incident reporting & alerts in one platform for all sites
- Standardize threat analysis & benchmarking

## IT'S ALL ON THE DASHBOARD

**Our live dashboard is fully customizable, giving all stakeholders access to the information they need.**

- Real-time dashboard keeps everybody informed at all times
- Customizable to meet multiple site specifications & requirements
- One single view into staffing, operations and compliance
