

DESCRIPTION

FenceSafe-E is the world's first temporary security fence with active monitored pulse fencing. Part of the revolutionary FenceSafe range of temporary rigid mesh fencing systems, it requires zero ground strike allowing rapid deployment anywhere around the globe.

By utilising pre-assembled modular end, return and adjustable corners, the entire system can be installed in record time. In development trials over 30m of the system was installed and commissioned in under 90 minutes.

Conforming to both BS 1722 Part 14 and Part 17, it provides a solution to offering an additional temporary layer of physical protection for sites and assets. Available in three different mesh options, including Eclipse-60 profiled, Dulok-Lite double-wire and Securus-Lite 358 systems.

Overall pulse height protection of 3.0m is possible with mesh to either 2.0 or 2.4m. The whole pulse fencing system is exclusively powered by Gallagher and installed by their Certified Channel Partners in line with Gallagher Code of Practice

FINISH

Our FenceSafe-E system is galvanised and polyester powder coated in a wide range of RAL Colours. Galvanised only systems are available as well as Marine Grade PPC.

HIRE OR PURCHASE

Available as a hire purchase for short to long term use via a CLD and Gallagher approved partner. The system can also be purchased and installed via a Gallagher Certified Channel Partner.

Details of available partners via CLD Fencing Systems.
