

DESIGNED TO PREVENT FALLS DOWN ACCESS CHAMBERS AND HATCHWAYS, COVERSAFE ACCESS IS A FALL PREVENTION SYSTEM AND WORKING PLATFORM CONSTRUCTED WITH GRP. THE ACCESS COVER CAN BE FIXED INTO POSITION TO PREVENT IT FROM SLIPPING OUT OF PLACE, AND IS HINGED TO PROVIDE FULL ACCESS FOR MATERIALS WHEN WORKING IN SMALL SPACES.

PREVENT FALLS DOWN ACCESS CHAMBERS / HATCHWAYS WITH AN ADJUSTABLE HINGED COVER

EXPANDABLE ACCESS COVER

KEY FEATURES & BENEFITS

- Hinged fall prevention system which can be adapted to many sizes
- Lightweight access cover for manholes and hatchways
- Formulated with GRP to prevent shocks from faulty or broken electrics

CoverSafe Access is a hinged cover to prevent falls down manholes or hatchways. Its adjustable design means it can be used to cover a range of sizes and it can be fixed into position to prevent it from slipping out of place. The hinged design allows access for materials when working in small spaces.

Formulated with GRP material, it provides a robust, safe working platform, allowing work to be carried out on and around it. CoverSafe Access helps to improve efficiency on site and aids in meeting the HSE safety requirements acting as a fall prevention system.

The CoverSafe Access is easy to install, locks in a safe position when used as a manhole cover and is easily fixed in place when used as a hatch cover. The trellis slides open for quick access and hinges to provide full access for materials when working in loft/attic spaces.

Our CoverSafe Access conforms to BS.8630:2019 safety standards.
