# PROTECTA® FR PUTTY PADS

for tap water wall boxes

---

Protecta® FR Putty Pads are an easy to apply fire and sound rated sealant supplied as a non-setting putty. The pad is hand workable, re-useable and re-serviceable due to its non-setting properties. They are supplied in pre-shaped moldable pads which are push-fit self adhesive.

In the event of a fire the tightly moulded seal will prevent the passage of smoke and gas. In extreme heat the putty will expand to close the area left by the melting pipes, also preventing the passage of fire.

## Main Uses

Protecta® FR Putty Pads are shaped for use on both single and double wall box installations in dry lining walls. The pads are supplied in kits containing a rectangular and a circular shape that fits to the wall boxes.

## BENEFITS:

- SOLVENT FREE
- UNAFFECTED BY MOISTURE
- 90 MINUTES FIRE RESISTANCE
- NO SPECIAL TOOLS REQUIRED
