

LJR Fire & Security Group

One of the regions most trusted and reliable
Fire & Security Companies.

About us

LJR Fire & Security Group Limited has a mission statement to be the best in class. Our approach to projects & routine works is to make sure we are in a position to complete a task in hand within budget & delivered on time.

We pride ourselves on always exceeding our clients' expectations with clear & concise communication.

Our fire, security & electrical division has extensive knowledge in both high end residential, multi residential, industrial & commercial developments.

We have a highly qualified team of Fire, Security & Electrical engineers together with health & safety specialists, along with array of accreditations.

Our management team are the backbone to our business, on-site work is only part of the delivery process of a project & having backroom support to collate accurate management information, organized & thorough record keeping along an audit trail for all our work, is crucial to a professional contracting company.

PPM's along with re-active repairs are also areas where we offer an exceptional service & always meet relevant KPI's.

BrightSafe

LJR Fire & Security Group have partnered with BrightSafe. This has made all our staff management & HR so simple, straightforward & stress-free.

Some of the key benefits to our customers are:

- All of our engineers are qualified to ROSPA standards having access to around 30 courses in health & safety.
- RAMS uploaded before works are commenced.
- Having all workplace accidents/ near misses stored on the system.

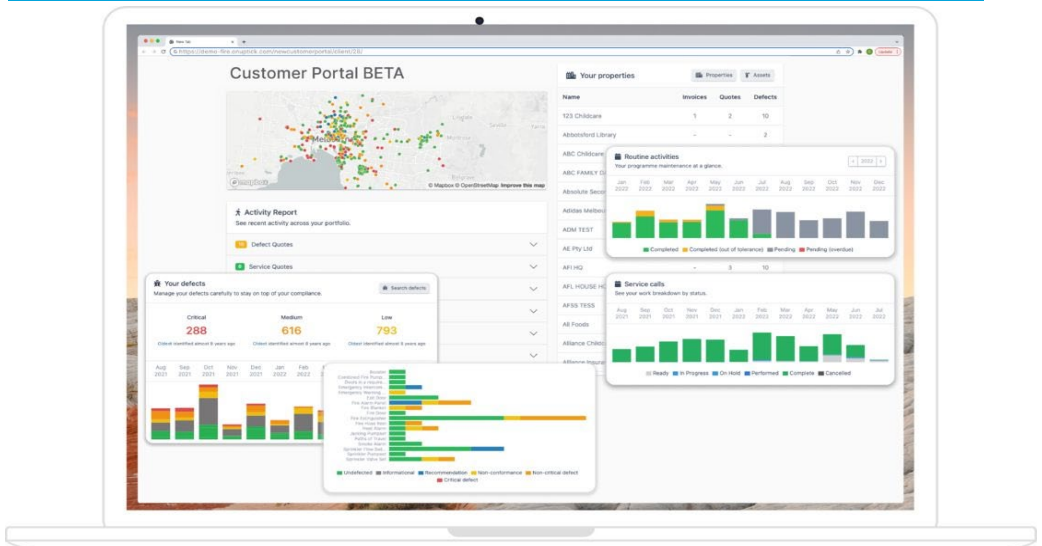

CRM / Customer Portal

LJR Fire & Security Group have now successfully implemented the Uptick asset management platform into their business. Uptick provides LJR with a cloud based engine from which we can schedule & manage our servicing operations efficiently.

LJR have also implemented Uptick in order to ensure key Fire Safety Compliance information is available digitally, in accordance with the changes to the British Standards.

Some of the key benefits to our customers are:

- Less paperwork, less emails – everything will be available digitally from your customer portal.
- Better compliance – customers can access their Fire, Security & Electrical Maintenance records from their own portal.
- More accurate, more up-to-date property & asset information.
- Faster defect quoting & approvals.
