CONSOLE SOLUTIONS

THE CONSOLE EXPERTS

Winsted create attractive, ergonomic control room consoles and workstations that work with your operators to improve comfort and optimise efficiency.

Whether you are building a state-of-the-art control room from the ground up, or simply need to upgrade your operations, Winsted can provide the ideal technical furniture solution. Our experts combine the disciplines of industrial design, ergonomics and interior design to create solutions that are both efficient and eye-catching.

We give special consideration to the ergonomic requirements of your operators to build consoles that reduce fatigue, improve productivity and inspire.

Productivity by design

DESIGN SERVICE

Winsted go to great lengths to understand your needs and the objectives of your project. Our experienced designers will engineer your console to suit your exact requirements, space and functionality.

We carefully consider the ergonomic requirements of your operators to design consoles that facilitate the complex interactions between personnel, technology and the environment.

Once the design is complete, we will provide you with a complete specification package ready for presentation. We can provide Building Information Modelling files (BIM) for Revit®, full CAD drawings in multiple views, photo-quality colour renderings of the console design and even animated “walk-through” videos of the proposed installation.

WHAT WE OFFER

- FREE Design Service
- FREE Consultation
- FREE Downloadable Design Software
- FREE Project Support

WHY CHOOSE WINSTED

- 60 years experience
- World class customer service
- Global reach
- Console, installation and delivery solutions to suit your specific needs
